

Addendum Number 2 – VWRP 2604
March 24th, 2026

Item 1: Regarding Monthly Tonnage

Approximately 20 tonnes of cardboard are processed per month.

Item 2: Regarding Box Sizes

The size of cardboard boxes that are processed isn't consistent, though boxes which are very large can be cut before being loaded into the baler.

Item 3: Regarding Tie Type

Manual tie balers are preferred.

Item 4: Regarding Space Restrictions

The space in which the baler must fit is 19 ft by 26 ft.

Item 5: Regarding Conveyor Feeding

A conveyor must be priced with the baler unit. The conveyor must be capable of feeding the unit perpendicular to the direction that bales are ejected.

Item 6: Regarding Facility Hours

Valley Waste's Kentville facility runs five and a half (5.5) days per week, with five 8-hour shifts, and one 4-hour shift.
